What would you do to save the life of your child?

Itâ€™s a question microbiologist Richard Draman thought heâ€™d answered when he walked away from his career to focus on curing a genetic defect that is causing his daughter to age at a wildly accelerated rate. But now he and his wife Carly are being forced to come to terms with the fact that eight-year-old Susieâ€™s time is running out. Then they receive an unexpected gift: startling new research into the fundamental secrets of life that could be the miracle theyâ€™ve been looking for.

When Richard is arrested on a trumped-up charge of having stolen the data, he takes his family and runs, seeking out a retired special-forces operative and old friend to help dig up the truth behind the controversial experiments. Determined to either save Susieâ€™s life or die trying, the Dramans plunge into a bloody conflict between two powerful factions vying for control of a discovery that could change the face of humanity.
